

Fania Raczinski

Improvisation 25

based on

Wassily Kandinsky - Improvisation 29 (1917)

Available at: https://fania.github.io/css_drawing/kandinsky

Fania is a lecturer, researcher, and artist. She has a long-standing interest in the Blaue Reiter group of Expressionist artists, especially Franz Marc (1880-1916) and Wassily Kandinsky (1866-1944), and this piece is a continuation in a series of artworks that create digitally animated interpretations of Blaue Reiter originals.

Her previous focus was SVGs (Scalable Vector Graphics) but for this exhibition she specialised in CSS (Cascading Style Sheets) to create the drawing and animation and a little bit of JavaScript to include a camera for basic motion triggers. There are 86 different individual components on the screen that make up the image - on 9 different layers!
